

Pushbutton Marking Guide

Marking Options

Engraving — Recommended for small to medium production quantities. Standard type: 12 point David. Up to three (3) lines of type, with eight (8) characters per line. Black print standard, white also available.

Laser Etching — Recommended for small to medium production quantities. Please note style of legend orientation when ordering.

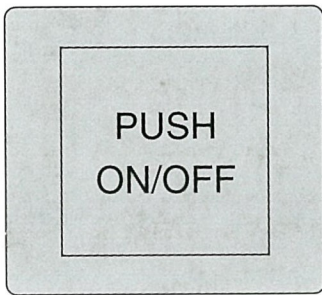

Mylar Inserts — Where marking must be protected against wear, it can be printed on a clear film and set inside the transparent lens cap. Legend inserts can be purchased separately and installed or changed with ease. (For use with flat lens cap)

Pad Printing — Recommended for medium to high production volumes. Letters, figures, or symbols can be imprinted in standard or custom configurations. White print is standard; color available to meet customer specification.
